

GEZOFLEX COLOR RANGE

GEZOFLEX – EPDM granules for sports and leisure applications

GEZOFLEX are the EPDM rubber granules for first-class elastic floor coverings. Typical applications are athletic tracks and multi-sport surfaces, playground safety surfaces, prefabricated slabs, molded parts and rolled goods for various surfacing solutions. The granules can be processed with a one or two component polyurethane binder or coating. With the specially developed process GEZOLAN produces in Dagmersellen (CH) in the 4th generation and since 2018 in the USA the high-quality rubber granules for use all over the world.

The product advantages of GEZOFLEX

DURABLE

With GEZOFLEX EPDM granules you can be certain that you are receiving an actual EPDM content of at least 20% high-quality EPDM, which means you will get long-term enjoyment from your elastic surface coverings.

ECONOMICAL

GEZOFLEX EPDM granules feature the lowest dust content on the market, resulting in a better coverage and use of less binder. This saves money in the long run!

HARMLESS

GEZOFLEX products are tested comprehensively and inspected regularly. This allows GEZOLAN to guarantee a product that is harmless for people and the environment. With GEZOFLEX there will be no surprises in the case of external tests or for fulfilling the requirements of standards!

EASY TO INSTALL

GEZOFLEX EPDM granules have an optimal sieve curve and a low dust content. These properties allow a clean and uncomplicated installing, with lower material consumption and superior surface quality.

The colors marked with the US icon are manufactured at our US location. The colors without the US icon are manufactured at our Swiss location and may require a special order with longer delivery time depending on quantities.

Typical fields of application of GEZOFLEX EPDM granules

GEZOFLEX granules are available in a standard grain size of 1.0 - 4.0 mm. The RAL color numbers refer to the loose granules and are only indicative and approximate. Please contact your responsible sales representative for further available grain sizes and original color samples. Special colors on request.
